-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: In the specification at page 1 paragraph 1 line 2 "Serial Number 06/468,755" should be --Serial Number 60/468,755--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Labofish.

The device as claimed is disclosed by Labofish as shown in figures 1 and 2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Link.

The device as claimed is substantially disclosed by Link as shown by figures 1 and 6, but lacks the two embodiments being in one device. It is old and well known to make an integral device of two separate devices. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to connect the two embodiments shown by figures 1 and 6 of Link into a single device to make an internal and external gauge in one device.

Allowable Subject Matter

6. Claims 1-20 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter: A gauge with spaced first and second parallel measuring surfaces having a first step surface intersecting the first measuring surface, a second step intersecting the second measuring surface, and a back stop intersecting the first and second measuring surfaces with the first step, second step, and the back stop for positioning a caliper gauge against the first and second measuring surfaces.
